Storm is premium prestashop theme for multipopurse.
Storm has variety of home page layouts and includes designs for Digital store, Fashion mart, clothing, bicycle shop, Food place, Furniture store, Jewellery Palace, Shoes paradise, Sunglasses, and Watches store. Storm can be used for any Ecommerce store using different design blocks.

1. How to install theme:
 - Go to Preferences -> Themes, click "Add new theme" button on right top
  + Option 1: Import from your computer: using the file explorer to find the archive.
  + Option 2: Upload zip file to themes folder via ftp
 - Click "Next" button, A quick summary is displayed in the next page, indicating what that importer is about to do.

 - Click "Next" again to validate your choice. The theme is now installed, and PrestaShop asks you if you wish to install modules that were imported along with the theme, what you would rather do with the current modules configuration, and how you would like the images configuration to be taken into account.

 - Click "Next" one last time. A final confirmation page presents you with all the changes applied to your PrestaShop site. Click "Finish" to end the process.

2. Modules

  a. JMS Page Builder 3.0: it allows admin to manage homepages layouts, have more than 26 addon elements, emebed modules.
